

# Process Monitoring Module PMM-300

## FEATURES

- Standalone 5 channels protection & monitoring system
- Predefined acquisition modes
- Multiple sensors input
- Individual Alert and Danger alarm threshold setting
- Built-in interfaces (4..20mA, modbus RTU, relays, BNC...)
- Connection with database CMS-500

## DESCRIPTION

Standalone 5 channel (4x dynamic signals and 1x reference signal) Process Monitoring Module (PMM) designed for the protection and monitoring of rotating machines.

The universal signal conditioning allows to connect proximity probes, piezoelectric sensors, airgap sensors and magnetic flux sensors directly without additional hardware interface.

The individual alarm and danger thresholds are configurable for each channel at 8 OTP modes (selection via digital input) or at 16 modes (selection via modbus / profibus interface).

The architecture is open with built-in 4x4..20mA output, modbus RTU, digital outputs and relays. The profibus interface is available as option.

The BNC terminals provide 1:1 raw signals for external analysis.

The Ethernet interface allow via TCP/IP to configure the system and to connect it to the CMS-500 and real time software. The system is supplied with real time software for real time data visualisation.

## Monitoring solution

-  Endwinding monitoring
-  Air gap monitoring
-  Magnetic flux monitoring
-  Roller bearing monitoring
-  Axial thrust position
-  Shaft & bearing vibration

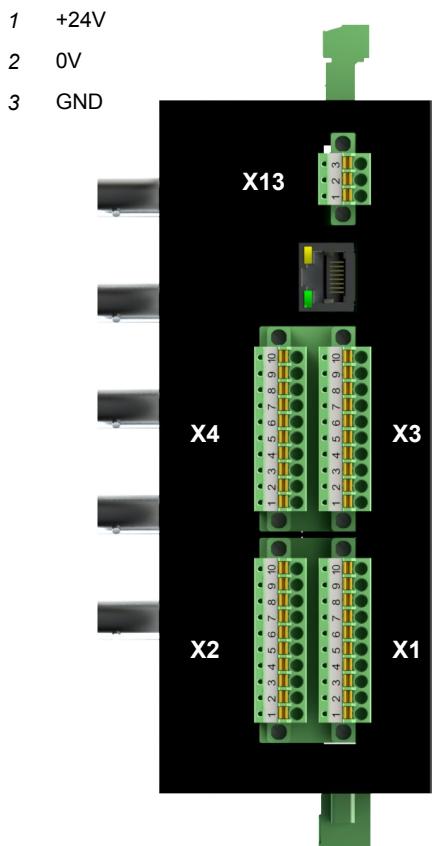

## Related applications

-  Hydrogenerators
-  Pumps, fan, cooling towers...
-  Windturbines
-  Gearless millsdrives
-  Turbogenerators
-  Gas & steam turbines

## GLOBAL SPECIFICATION

### ELECTRICAL CHARACTERISTICS

Supply voltage	+24VDC ±10%
Current consumption	Standalone :125mA Max (sensors/relay,...) : 1.22A
4x Sensor input terminals	
Selectable frequency range	400 to 1600 Hz
Sensor power supply	4x ± 24VDC, 300mA fused
Sensor interface	
- Voltage (differential)	± 24VDC
- Voltage (single ended)	± 24VDC
Current	(0)4..20mA, 250Ω
Constant current source	4mA
1x Reference signal input terminals	
Sensor power supply	1x ± 24VDC, 300mA
Sensor interface	
- Digital sensor input	0..+24V
- Analogue sensor input	0..-24V
4x Digital input terminals	
Contact type & specifications	SPDT (NO/NC), 10A240VDC or 8A/30VDC
System ok	For the system
Sensor ok	Common for all sensors
Alert	Common for all sensors
Danger	Common for all sensors

## GLOBAL SPECIFICATION

### ELECTRICAL CHARACTERISTICS

13x Digital output (15 pol D-Sub HD female)

Voltage output (per channel)	+24VDC, 20mA max
System ok	1x for the system
Sensor ok	4x individual per channel
Alert	4x individual per channel
Danger	4x individual per channel

4x Relays output terminals

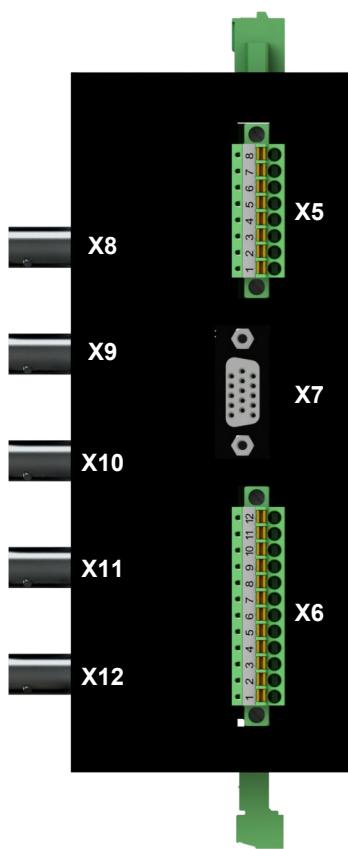

Contact type & specifications	SPDT (NO/NC), 10A240VDC or 8A/30VDC
System ok	For the system
Sensor ok	Common for all sensors
Alert	Common for all sensors
Danger	Common for all sensors

4x Analogue output terminals

Current output	4..20mA
Max load	500Ω
Protection	Short circuit proof
Resolution	12bit

5x RAW output

BNC connector	1:1 buffered output for each channel and reference signal
Protection	Short circuit proof

#### X5 : Analogue outputs

- 1 CH1 (+)
- 2 CH1 (-)
- 3 CH2 (+)
- 4 CH2 (-)
- 5 CH3 (+)
- 6 CH3 (-)
- 7 CH4 (+)
- 8 CH4 (-)

#### X6 : Relay outputs

- 1 NO (System OK)\*
- 2 C (System OK)\*
- 3 NC (System OK)\*
- 4 NO (Sensor OK)\*
- 5 C (Sensor OK)\*
- 6 NC (Sensor OK)\*
- 7 NO (Alert)
- 8 C (Alert)
- 9 NC (Alert)
- 10 NO (Danger)
- 11 C (Danger)
- 12 NC (Danger)

#### X7 : 24V Digital outputs

- 1 System OK
- 2 S1 Sensor OK
- 3 S1 Alert
- 4 S1 Danger
- 5 S2 Sensor OK
- 6 S2 Alert
- 7 S2 Danger
- 8 S3 Sensor OK
- 9 S3 Alert
- 10 S3 Danger
- 11 S4 Sensor OK
- 12 S4 Alert
- 13 S4 Danger
- 14 GND
- 15 GND

#### Raw signal outputs (BNC)

- X8 Keyphazor raw signal
- X9 Sensor 1 raw signal
- X10 Sensor 2 raw signal
- X11 Sensor 3 raw signal
- X12 Sensor 4 raw signal

\*Fail safe

## GLOBAL SPECIFICATION

### ANALOGUE INPUTS DETAILS

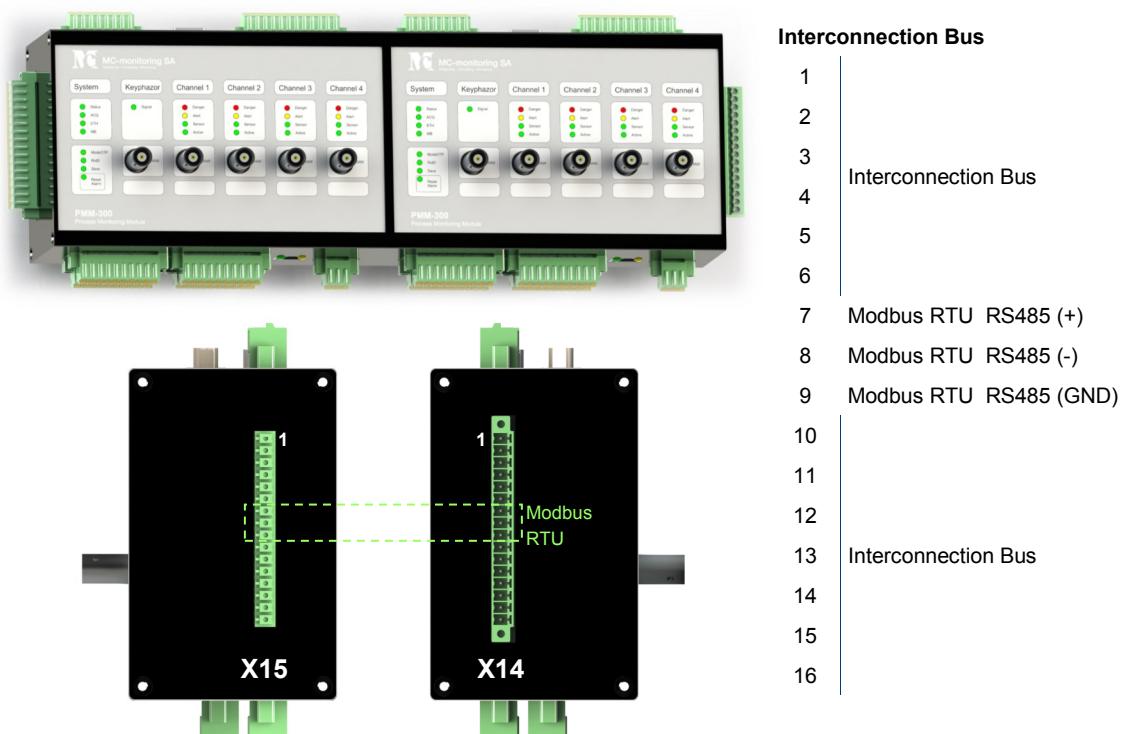

Mode name	Description	Electrical specifications
+/-24V Single Ended	Voltage input mode with measurement on INx+ referenced to the INx- which is internally tied to 0V.	INx+ range: -24V to +24V AMR <sup>1)</sup> : +/-24V
+/-24V Differential	Voltage input mode with differential measurement between INx+ and INx- which are both floating.	INx+ range: -24V to +24V AMR <sup>1)</sup> : +/-24V INx- range: -24V to +24V AMR <sup>1)</sup> : +/-24V
0(4)-20mA Differential	Current input mode with differential measurement across INx+ and INx- which are both floating. The internal reading shunt resistor value is $250\Omega \pm 10\Omega$	INx+ to INx- range: 0 to 20mA AMR <sup>1)</sup> : +/-100mA
ICP® 4mA input	Specific mode for ICP-type piezo sensors	INx+ range: 0 to 24V INx- range: 0V

<sup>1)</sup>AMR: Absolute maximum ratings: if the applied voltage or current exceeds the absolute maximum ratings it may damage the input

### COMMUNICATION INTERFACES

RS485	Modbus RTU
Ethernet, 100Mbit	Configuration & CMS-500
Interconnection bus	Available to connect up to 8x PMM-300 + 1x PMM-320 <sup>2)</sup>

<sup>2)</sup>PMM-320: Display module for PMM-300, see PMM-320 datasheet for further information

## MEASUREMENTS

### CHARACTERISTICS

#### Acquisition

Type	4 channel true simultaneous
Resolution	16bit
Max. sampling rate	200kS/s per channel
Accuracy	< 1% of FS
Temperature deviation	±2ppm/°C at FS, 10µV/°C offset drift
Internal memory	64MB SDRam
Storage capacity	16GB

Acquisition	Signal processing	Monitoring parameters	Alarms	Interface
<b>4x Relative Vibration (according to ISO 7919)</b>				
s/s : 1024, 2048, 4096 Hz	<b>Filtering</b>	Smax (µm pk), on CH1-2 & CH3-4	1x monitoring parameter per channel, every 1s	<b>Analogue output</b>

## GLOBAL SPECIFICATIONS

### ENVIRONMENTAL CHARACTERISTICS

Temperature range	
Operation	0°C to +55°C
Storage	-20°C to +70°C
EMC	EN/IEC 61326-1
Environmental testing	
Dry heat testing	IEC-60068-2-2
Damp heat steady state	IEC-600-68-2-78

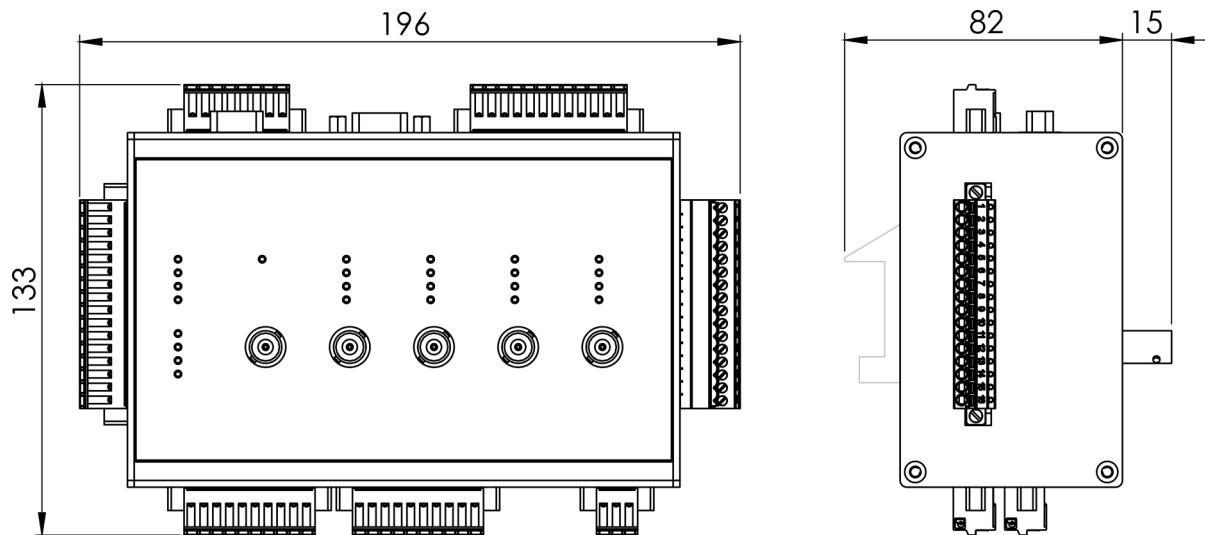

### PHYSICAL CHARACTERISTICS

Mounting	DIN 35mm rail mount
Terminals	Input and output via push-in terminals

## ORDERING INFORMATION

Part type	Ordering code	Description
PMM-300	20.310.001	PMM-300 with Modbus RTU
	20.310.002	PMM-300 with optional Profibus DP
PMM-320	20.320.000	Display module for PMM-300 (optional)
